

Nutrition that starts with your own numbers

Nori takes your health context, reads the food in front of you, and answers in plain language — always saying what it measured against.

The brand's job is to make that feel like help rather than surveillance. Warm ground, round forms, short sentences, and no scolding anywhere in the product.

- Warm

Specific

Unhurried

Never scolding

Logo

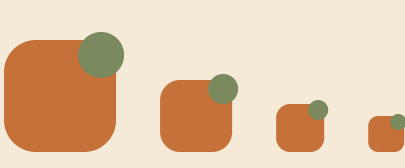

A soft sheet with a seed resting on its corner: the food, and the small thing you couldn't see until something looked at it for you. Two shapes, no outline, no gradient.

PRIMARY LOCKUP

REVERSED

56 / 36 / 24 / 18 px. Corner radius is always 28% of the sheet; the seed is 42% and always breaks the corner.

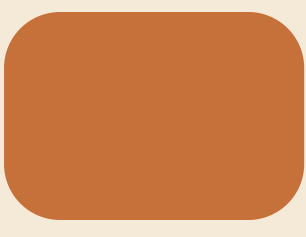

App icon. Clearspace equals one seed diameter on every side.

Do Let the seed overhang. Keep both shapes solid.

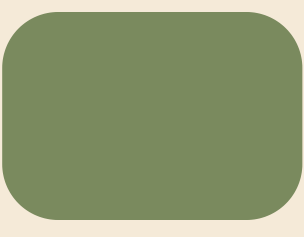

Don't Outline it, rotate it, add a gradient, or tuck the seed inside the sheet.

Colour

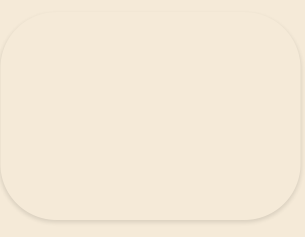

Cream ground, terracotta for action, sage as a genuine second voice — used for progress, confirmations and the calm parts of the interface. Ink for all reading text.

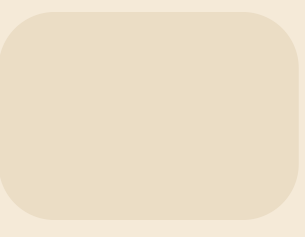

Terracotta
#C67139 · primary action

Sage
#7A8A5E · second voice

Cream
#F5EAD8 · ground

Sand
Cards and panels

Ink
Text, dark tiles

For terracotta text at paragraph size use the deep step (**accent-700**) — the base tone is for fills, icons and large type only.

Type

Caprasimo carries the name, page titles and the one big number on a screen. Figtree does everything else, including all figures — a nutrition panel should read like a note, not a receipt.

Eat like someone who knows you

DISPLAY · CAPRASIMO · 1.0 LEADING

Two people, one meal, two answers

TITLE · CAPRASIMO 32

Nori reads your profile before it reads the plate. Every answer names what it measured against, and you can change that profile whenever the facts change.

BODY · FIGTREE 17 / 1.6

MEAL HISTORY — 14 DAYS

LABEL · FIGTREE 14 · 700

Interface parts

Pills for anything pressable, 16px radius for anything that holds content, and a minimum 48px tall target on mobile. Icons are Lucide at stroke 2.75 so they match the round forms.

Voice

SAY

"High in salt against the 1,800 mg in your profile — about 60% of it in this one bowl."

NOT

"Unhealthy choice. Avoid."

SAY

"I guessed the portion from your photo. Fix it and I'll redo the numbers."

NOT

"Analysis complete. 640 calories."

SAY

"That one belongs with your clinician. Here's what I can tell you about the food."

NOT

"Based on your symptoms, you may have..."

WHERE WE STOP

Nori is a decision-support and education tool, not a medical replacement or diagnostic system.

Shown in the same words on first run, in the health profile, and at the foot of every exported report. Nori never diagnoses, prescribes or treats, and it says so when a question crosses that line.
